Two ways to be big

Two ways to be big: A country is **big** if it has an area of more than 3 million sq km or it has a population of more than 250 million.

Show the countries that are big by area or big by population. Show name, population and area.

```
SELECT name, population, area FROM world
WHERE area > 3000000 OR population > 250000000

8. 😊

Exclusive OR (XOR). Show the countries that are big by area (more than 3 million) or big by population (more than 250 million) but not both. Show name, population and area.

- Australia has a big area but a small population, it should be **included**.
- Indonesia has a big population but a small area, it should be **included**.
- China has a big population **and** big area, it should be **excluded**.
- United Kingdom has a small population and a small area, it should be **excluded**.

9. 😊

Show the `name` and `population` in millions and the GDP in billions for the countries of the `continent` 'South America'. Use the [ROUND](#) function to show the values to two decimal places.

For South America show population in millions and GDP in billions both to 2 decimal places.

Millions and billions

```
SELECT name, round (population/1000000, 2) AS population, round (gdp/1000000000, 2) AS 'GDP' FROM world

Greece has capital Athens.

Each of the strings 'Greece', and 'Athens' has 6 characters.

Show the name and capital where the name and the capital have the same number of characters.

- You can use the `LENGTH` function to find the number of characters in a string

```
SELECT name, capital FROM world
WHERE LENGTH(name)=LENGTH(capital)
```

The capital of Sweden is Stockholm. Both words start with the letter 'S'.

Show the name and the capital where the first letters of each match. Don't include countries where the name and the capital are the same word.

- You can use the function `LEFT` to isolate the first character.
- You can use `<>` as the **NOT EQUALS** operator.

```
SELECT name, capital
FROM world

Find the country that has all the vowels and no spaces in its name.

- You can use the phrase `name NOT LIKE '%a%'` to exclude characters from your results.
- The query shown misses countries like Bahamas and Belarus because they contain at least one 'a'

```
SELECT name
FROM world
WHERE name LIKE '%a%' AND name LIKE '%e%' AND name LIKE '%i%' AND name LIKE '%o%' AND name LIKE '%u%'
AND name NOT LIKE '% %'
```
